1	PROCESS DISINFECTING, PRESERVING,	27	And additional disinfecting or
	DEODORIZING, OR STERILIZING		sterilizing agent
2	.Step of warning or decreasing	28	.Using disinfecting or
	hazard of process		sterilizing substance
3	.Process control in response to	29	In situ generation of agent
	analysis		other than aldehyde or glycol
4	.A gas is substance acted upon	30	And removing the agent by
5	.Deodorizing		chemical reaction or sorption
6	.Affecting structure, article,	31	And recovering or reusing the
	etc., submerged in marine		agent
	environment	32	Treating bulk material
7	.Maintaining environment	33	With positive pressure or
	nondestructive to metal		vacuum
8	Using protective article (e.g.,	34	Using alkylene oxide
	antitarnish fabric, etc.)	35	Using cyanide
9	Using gaseous preservative,	36	Using aldehyde
	preservative added to gaseous	37	Using halogen or halogen-
	phase of environment, or		containing compound
	maintaining gaseous phase	38	.Using fluent heat transfer
	nondestructive		medium other than air
10	Manipulating gaseous	39	.By sudden release of pressure
	environment for preservative	40	.Process of storage or protection
	purpose	41	Of liquid
11	Steam environment	42	By preventing evaporation
12	Aqueous acid environment	43	Of water
1.2	(i.e.,pH << 4.1)	44	BLOOD TREATING DEVICE FOR
13	Aqueous alkali environment	4.5	TRANSFUSIBLE BLOOD
14	(i.e., pH >> 8.4)	45	.Oxygenator
14	Essentially pure water environment	46	Including integral heat-
15	Using organic compound having	47	exchange meansBubble or foam producing
13	phosphorus	48	Membrane
16	Using organic nitrogen	40	Memorane INCLUDING MEANS FACILITATING PART
10	compound other than ammonium	49	REPLACEMENT OR REPAIR OTHER
	salt		THAN SOLID, EXTENDED SURFACE,
17	Using organic carboxylic acid		FLUID CONTACT MEANS
± /	or salt thereof	50	ANALYZER, STRUCTURED INDICATOR,
18	Using inorganic silicon or	30	OR MANIPULATIVE LABORATORY
10	phosphorus compound		DEVICE
19	Using heavy metal or compound	51	.Calorimeter
	thereof	52	.Chemiluminescent
20	.Using sonic or ultrasonic energy	53	.Corrosion tester
21	.Using microwave energy	54	.Flame ionization detector
22	.Using direct contact with	55	.Structured visual or optical
	electrical or electromagnetic		indicator, per se
	radiation	56	Having reagent in absorbent or
23	In atmosphere other than air		bibulous substrate
24	Ultraviolet	57	Having coated reagent
25	.Including additional step of	58	In holder or container having
	preventing damage to sealed		special form
	container	59	Column
26	.Using direct contact steam to	60	Having plural-layered
	disinfect or sterilize		material

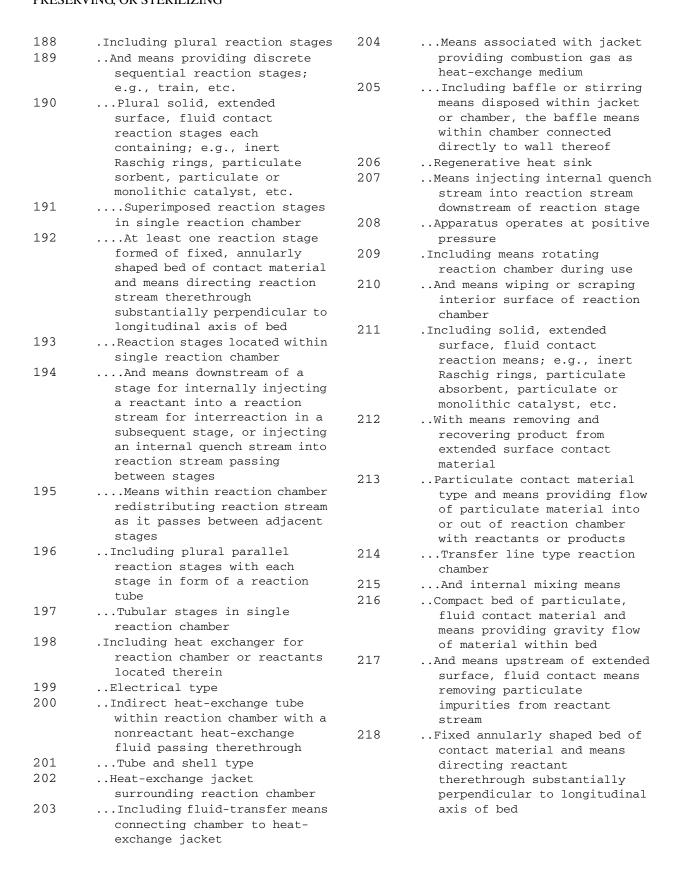

422 - 2 CLASS 422 CHEMICAL APPARATUS AND PROCESS DISINFECTING, DEODORIZING, PRESERVING, OR STERILIZING

61	.Test package or kit	83	.Means for analyzing gas sample
62	.Automatic analytical monitor and	84	Breath tester
	control of industrial process	85	Based on color change
63	.Sample mechanical transport	86	Including means reacting gas
	means in or for automated		with color indicator
	analytical system	87	Strip indicator
64	Means is turntable (circular)	88	Including means for adsorbing
65	Means is conveyor and rack	00	_
	-		or absorbing gas into or onto
66	Means is moving tape or band	0.0	liquid or solid media
67	With specific analytical	89	Gas chromatography
	program control means	90	With conductiometric detector
68.1	.Means for analyzing liquid or	91	With photometric detector
	solid sample	92	With volumetric detector
69	Sorption testing	93	Including means dividing sample
70	Liquid chromatography		stream into plural parallel
71	With radioactive material		segments having diverse
72	Including centrifuge		treating means and the
73	With coagulometer for		analytical result compared or
, 3	agglutination, clotting, or		combined
	prothrombin, or for particle	94	Combustible gas detector
	(e.g., cell, etc.) counting,	95	With thermoelectric detector
	or volume or characteristics	96	Wheatstone bridge
	determination	97	
7.4		97	With specific coating on
74	Dairy tester		bridge element
75	Including titrator	98	Analysis based on electrical
76	Conductiometric type		measurement
77	With integrating or	99	.Miscellaneous laboratory
	differentiating means		apparatus and elements, per se
78	Including means for pyrolysis,	100	Pipette or other volumetric
	combustion, or oxidation		fluid transfer means
79	Biological, chemical, or total	101	Including means for separating
	oxygen demand (i.e., BOD, COD,		a constituent; e.g., filter,
	TOD)		condenser, extractor, etc.
80	And means directly analyzing	102	Container
00	evolved gas	103	Valve or connector structure
81	3	103	
0.1	Automated system with sample fluid pressure transport means	104	<pre>Holder, support, housing, or hood</pre>
82	And means segmenting fluid	105	CONTROL ELEMENT RESPONSIVE TO A
02	material	105	SENSED OPERATING CONDITION
82.01		106	
	Measuring electrical property		Responsive to liquid level
82.02	Resistance or conductivity	107	.Control element directly
82.03	Ion selective electrode		mechanically linked to
82.04	Dissolved gas		separate sensor
82.05	Measuring optical property by	108	.Control element responds
	using ultraviolet, infrared,		proportionally to a variable
	or visible light		signal from a sensor
82.06	Optode or optrode	109	Controls heat transfer
82.07	Fluorescence	110	Controls flow rate of a
82.08	Fluorescence		material to or from a contact
82.09	Absorbance or transmittance		zone
82.11	Waveguides	111	Material is an input to
82.12	Measuring temperature		contact zone
82.13		112	.Control element is fluid
04.13	Measuring pressure		pressure sensitive
			Prepare perprete

112	Programs malief 1 /	120	mluidi-ad bad
113	Pressure-relief valve (e.g.,	139	.Fluidized bed
111	pop-off valve) or check valve	140	With liquid present
114	.Control element is a binary	141	Plural reaction beds
115	responsive valve	142	Sequentially arranged
115	Valve diverts flow from a	143	Including specific wind box or
116	contact zone		particulate matter support
116	.Sensed condition is operating		grid
	time and control is operation	144	Including means to strip
117	sequencer		reaction mass from, or to
117	WITH SAFETY FEATURE		regenerate, the particulate
118	.Preventing opening of closure of		matter (including fluidized
	pressurized apparatus at	145	<pre>bed regenerators, per se)And means providing flow of</pre>
119	unsafe pressure	145	particulate matter into or out
119	WITH INDICATING, SIGNALLING, RECORDING, SAMPLING, OR		of reaction chamber
	INSPECTION MEANS	146	With heat exchange means
120	FOR DEODORIZING OF, OR CHEMICAL	140	affecting reaction chamber or
120	PURIFICATION OF, OR GENERATION		reactants located therein
	OF, LIFE-SUSTAINING	147	And means mechanically
	ENVIRONMENTAL GAS	117	separating and removing
121	.With means exposing gas to		particulate bed material from
	electromagnetic wave energy or		fluid effluent
	corpuscular radiation	148	.Ammonia synthesizer
122	.Including solid, extended	149	.With means simultaneously
	surface, fluid contact		carrying out conjugated
	reaction means (e.g., Raschig		reactions within single
	rings, particulate or		reactor
	monolithic catalyst, etc.)	150	.Pigment or carbon black producer
123	.Including means adding material	151	With means injecting quench
	into environmental gas		stream into reaction chamber
124	And mechanical means creating		downstream of reaction site
	forced draft at addition site	152	With particulate product
125	With material-heating means		collecting surface and means
126	Material is combusted		mechanically removing product
127	SHOCK OR SOUND WAVE		therefrom
128	.Including supersonic or	153	Moving collecting surface
	ultrasonic energy generation	154	Rotary collecting surface
	means	155	Disk or plate
129	CHEMICAL REACTOR	156	With plural sequential reaction
129.1	.Soap making	4.5.5	zones or chambers
130	.Bench scale	157	With movably or removably
131	.Organic polymerization		mounted plug means for
132	Closed loop		converting reactor from (N) to
133	Generating foamed plastic	158	(N+1) reaction stages
134	Including plural sequential		Vapor phase reaction type .For radioactive reactant or
	reaction stages	159	
135	Including reactant agitating	160	product
	means in reaction chamber	100	.Inorganic sulfur acid or
136	And means rotatably mounting	161	anhydride producing typeAcid is final product
	reaction chamber	162	
137	Horizontal reaction chamber	163	.Inorganic hydrator .Explosives synthesizer
120	with screw or worm agitator		
138	With heat exchanger for	164	<pre>.Solid reactant type (i.e., absence of fluid reactants)</pre>
	reaction chamber or reactants		absence of fiuld reactants)
	located therein		

422 - 4 CLASS 422 CHEMICAL APPARATUS AND PROCESS DISINFECTING, DEODORIZING, PRESERVING, OR STERILIZING

165	Including ignition means for	184.1	.For chemically destroying or
	reactant		disintegrating solid waste,
166	Electrically actuated		other than burning alone
167	Including reactor cooling means	185	.For chemical recovery of
	surrounding reactor		chemicals from waste paper
168	.Waste gas purifier		making liquor
169	Including means providing	186	.With means applying
	sequential purification stages		electromagnetic wave energy or
170	Plural chemical reaction		corpuscular radiation to
	stages		reactants for initiating or
171	Solid, extended surface,		perfecting chemical reaction
±,±	fluid contact type	186.01	Magnetic
172	And means downstream of a	186.02	Object protection
1/2		186.03	With electrical discharge
	stage for injecting a reactant	186.04	Electrostatic field or
	into waste gas for	100.04	electrical discharge
	interreaction in subsequent	186.05	_
450	stage	100.05	Treating surface of solid
173	With heat exchanger for	105.05	substrate
	reaction chamber or reactants	186.06	Surface is metal
	located therein	186.07	Ozonizers
174	Electrical type	186.08	With preparatory or product-
175	Regenerative heat sink		treating means
176	Including waste gas flow	186.09	With drying means
	distributor upstream of	186.1	With filtering or particle
	reaction site and within		removal means
	reaction chamber modifying	186.11	With cooling, compression,
	velocity profile of gas		condensation, or liquefying
177	Including solid, extended		means
	surface, fluid contact	186.12	With subsequent use means
	reaction means; e.g., inert	186.13	With electrode moving means
	Raschig rings, particulate	186.14	With fluent reactant flow
	absorbent, particulate or	100.14	control means
	monolithic catalyst, etc.	106 15	
178	And contact regenerating means	186.15	With current control or
1,0	or means for cleaning an		special electrical supply
	internal surface of the	105 15	means
	reaction chamber	186.16	With pulse generating means
179	Fixed bed with resilient or	186.18	Cylindrical electrode
1/9		186.19	With heating or cooling
	differential thermal expansion		means
100	compensating bed support means	186.2	With heating or cooling means
180	Unitary (i.e., nonparticulate)	186.21	Arc or spark discharge means
	contact bed (e.g., monolithic	186.22	With electrode or reaction
	catalyst bed, etc.)		space heating or cooling means
181	Fixed annularly shaped bed of	186.23	With preparatory or product-
	contact material and means	100,120	treating means
	directing gas therethrough	186.24	With nitrogen fixation means
	substantially perpendicular to	186.25	With nitrogen fixation meansWith cooling or pressurizing
	longitudinal axis of bed	100.25	
182	Including means injecting	106 26	means
	combustion fuel into reaction	186.26	With electrode moving means
	chamber in direct contact with	186.27	With current control means
	waste gas	186.28	With current control means
183	And means mixing combustion	186.29	With RF input means
	fuel with waste gas upstream	186.3	With ultraviolet radiation
	of reaction site		generating means
		187	.Combined

422 - 6 CLASS 422 CHEMICAL APPARATUS AND PROCESS DISINFECTING, DEODORIZING, PRESERVING, OR STERILIZING

219	And means loading contact material into, or unloading contact material from, reactor	237	Movably mounted container-type separating means and means moving same
220	or means providing internal contact material reservoirAnd reactant flow distributor	238	Solid reactant containing perforated or porous container-type separating
220	upstream of contact means and within reaction chamber	239	means Reaction chamber includes at
	modifying velocity profile of reactant flow		least one perforated, porous, or semipermeable wall and is
221	Fixed contact bed type with resilient or differential	0.4.0	adapted for holding solid reactant
	thermal expansion compensating bed support means	240	.Including specific material of construction
222	Unitary (i.e., nonparticulate)	241	Reactor liner
	contact bed, (e.g., monolithic	242	.Positive pressure type
	catalyst bed, etc.)	243	PHYSICAL TYPE APPARATUS
223	With contact material regenerating means, per se, or combined with reactor	244	.Including serially disposed vaporizing heating means
224	.Including internal mixing or stirring means		(sublimer) and solid material deposition means maintained at a temperature lower than said
225	Mechanical type stirring means		heating means (condenser)
226	In positive pressure reactor	245.1	.Crystallizer
227	Including a draft tube for	250.1	Crucible-free zone refiner
	internal recirculation	251	Including means separating and
228	Including flow directing baffle attached directly to		conveying crystals to a melting zone
229	reaction chamber wallLongitudinally extending	252	Hydraulic classifier with crystallizer
	spiral stirring means	253	Including feed compartment for
230	Thermosyphon or differential		introducing nutrient
	density mixing means; e.g., means internally recycling	254	Movable crystallizer or scraping means
	reaction mass via differential density pumping, etc.	255	.Means separating or dissolving a material constituent
231	Gas sparger type mixing means	256	Liquid-liquid contact means
232	submerged in liquid reactant .Including solid reactant and	257	Including pulsator, adjustable plates, or plural inlets;
	<pre>means charging solids into, or dischanging solids from,</pre>	0.5.0	e.g., spraying, etc.
	reaction chamber	258	Including rotating chamber or
233	Having both charge and discharge means along with		<pre>rotating member within chamber; e.g., mixer-settler, etc.</pre>
	means conveying solids	259	Having rotating member within
	therebetween located within reaction chamber		chamber
234		260	Including heating and cooling
	.Including external recycle loop		means
235	And means heating or cooling	261	Liquid-solid contact means
	loop or reaction mass located therein	262	Sulfur extraction
236	Including means separating	263	Including monolithic nonporous
430	reaction chamber into plural		body of solute
	reaction chamber into piural reactant-containing	264	Including means restricting
	compartments and means moving		solvent contact to one end of
	reactant therebetween		body of solute

265	Buoyant holder	293	Fluid having simultaneous
266	Manual or mountable holder;		diverse function
	e.g., soap holder, etc.	294	Including flexible or
267	Including means to remove		collapsible treating chamber
	solids from a filter	295	Including pressure treating
268	Conveyor support for solid		chamber (above ambient)
	material during contact; e.g.,	296	Fluid pressure maintains
	bucket, etc.		closure or seal
269	Including rotating member	297	And rack, support or handling
270	Member is container		means
271	Including internal rotating	298	And vaporizer; e.g., boiler,
	member		etc.
272	Partitions divide container	299	Constituting treating chamber
273	Member conveys material into	300	Including rack, support or
	and out of container; e.g.,		handling means
	screw propeller, etc.	301	Apparatus closure operates
274	Including perforated member		means immersing article or
	which is nonlinear or inclined		material in liquid chemical
	with respect to the major axis	302	For treating container or
	of container		covers therefor
275	Including parallel perforated	303	Container is inverted
	members perpendicular to, or	304	Including endless conveyor
	parallel to, major axis of	305	.Including gas generating means
	container	306	.Including means for adding a
276	Side wall of holder perforated		material to a gas
277	Perforations of holder form	307	.Heat treating vessel with
	inlet for solvent		heating means
278	Including plural orifice	308	Including multiple stages
	inlet, or deflector adjacent	309	Including comminuting,
0.70	inlet for solvent flow		kneading, or surface-wiping
279	Having inlet submerged within		means interior or vessel
0.00	body of a solid solute	310	ELEMENTS OR ADJUNCTS
280	Solvent vapor condenser	311	.Bed support means (e.g., support
281	Means recirculating solvent		grid or plate for supporting
282	Including bypass		particulate bed of contact
283	Including dip tube for inlet	212	material, etc.)
204	or outlet of fluid solvent	312	.Tube element containing extended
284	Internal heater; e.g., steam		surface contact reaction means
205	coil, etc.		(e.g., a tube internally
285 286	And heating means Including mechanical		coated or packed with a catalyst, etc.)
200	-		catalyst, etc.)
287	comminuting or conveying meansWithin treating vessel		
288	Within treating vesselIncluding means removing vapor		
200	from treated material	anoaa	DESERVED ADM COLLECTIONS
289	And direct contact heating	CROSS-	REFERENCE ART COLLECTIONS
200	fluid means within separating	0.00	
	or dissolving chamber vessel	900	DECREASING POLLUTION OR
290	And indirect contact heating	901	ENVIRONMENTAL IMPACT
	fluid means in separating or	901	POLYMER DISSOLVER
	dissolving chamber	304	SODIUM CHLORIDE AND POTASSIUM
291	.Combined	903	CHLORIDE DISSOLVER
292	.Apparatus for treating solid	903	RADIOACTIVE MATERIAL APPARATUS
	article or material with fluid	904 905	NITROGEN FIXATION MEANS
	chemical	900	MISCELLANEOUS LIQUID
			STERILIZATION MEANS

422 - 8 CLASS 422 CHEMICAL APPARATUS AND PROCESS DISINFECTING, DEODORIZING, PRESERVING, OR STERILIZING
